

the Harrold

Week of October 9-14, 2017

Interesting Facts for the Week

Roman gladiators were the ancient era equivalent of our celebrities. Being a (successful) gladiator earned you fame and money. They were so revered that their bodily fluids and occasionally organs were harvested and sold to people. Gladiator sweat was collected from bathhouses and mixed together with cosmetic creams as an aphrodisiac. It was believed that the gladiator's warrior essence would make people nearby lust after you. In the early stages of the Roman Empire, it was also believed that a gladiator's blood (or his liver) was a cure for epilepsy. In addition to this, urine was a vital part of cleaning in the Roman Empire. They would use urine to wash their clothes, tan animal hides, and even whiten their teeth. Even if it seems disgusting now, it makes a lot of sense. Urine is full of ammonia, which is a potent cleanser. The collection and selling of urine from public restrooms was common practice, so much so that eventually the Emperor Vespasian created a urine tax to profit from the lucrative industry.
