

the Harrold

Week of Sept 4-9, 2017

Interesting Facts for the Week

In the 1960s, the sugar industry paid three Harvard scientists \$50,000 to say that heart disease was most likely caused by saturated fat. After their report was published in JAMA, diets concentrating on low fat gained the endorsement of many health authorities.

Nazis cleared minefields by chasing captured civilians across, detonating the explosives.

During WW1 the Ottoman government murdered over 1,500,000 Armenians living in their empire. The event coined the word "Genocide". The Armenian Genocide is the second most-studied case of genocide after the Holocaust.
