Weeks of January 18-23, 2021

## Interesting Facts for the Week

To men in Victorian England, women were beautiful but fragile and in need of their constant protection. The 19th-century British woman was, on the whole, considered a delicate creature that couldn't handle a lot of things. You couldn't expect them to deal with the outside world for too long, which is why women's restrooms were first invented. They were literally rooms in public places where a woman could go to sit down on chairs or couches and rest up from the stress of human interaction. These rooms predated indoor plumbing by many decades, and so they were nothing but nice sitting areas in which to "rest." Then, once public toilets became a thing, Victorian England just decided to continue this trend, separating the genders by adding toilets to existing women's restrooms. It's why some of them today still look like a club's VIP section, while the design of men's washrooms are just for taking care of business.
