

the Harrold

Week of March 9-14, 2020

Interesting Facts for the Week

Some people are using scorpions as narcotics in parts of Afghanistan, Pakistan, and India. For starters, scorpions are a cheap high that can last anywhere from 10 hours to three days. The high is said to be so powerful that it outstrips heroin and provides a euphoric, floating feeling bolstered by the ability to remain completely alert. The downside — and it's a pretty big one — is that the person spends the first six or so hours in pain while their body adjusts to the toxins. Oh, and it's possible to experience short- and long-term memory loss, sleeping and appetite disorders, a constant state of delusions or death. At a cost of 70 to 200 rupees, or \$1 to \$3 in U.S. currency, a dealer will place a scorpion in a person's hand and bat it with a stick until it imparts venom with its tail. Others opt to smoke the scorpion, which involves burning it alive over coals while inhaling the venomous smoke. Still others will dry a dead scorpion in sunlight, mix its remains with hashish and tobacco, and either roll it like a cigarette or place it in a small pipe.

this week

After School Detention

Myers

- Remind students that ear phones /ear buds, etc. are not to be worn inside the school building. The best practice might be to say they can wear them in the buses, but not before or after.

"Old George has been with the company 38 years. Do I hear \$300?"

this week cont.

- Note:** Smart watches are becoming more normal for kids. Before any work that requires a security measure (tests, etc.,) students will need to remove those and put them in their backpacks—not pockets.
- The two snow days on our 2019-2020 School Calendar, Friday, April 10th and Monday, April 13th are now regular school days.

the future

March 23-28 and Beyond

After School Detention

King
